css3 ... I am trying to query for all of the div that have classes set up to "k-block" (as seen in the img tag above). With this, the query below works as expected when I am able to limit the document. `var query = $("div.k-block");` If I add a condition to the query to require it to have children, I no longer get a result. `var query = $("div.k-block").children();` Is there something wrong with the way I am trying to approach this? A: here you are retrieving all children of div.k-block. instead `var query = $("div.k-block").children("div");`
