**Anti-inflammatory actions of serum amyloid A.** Serum amyloid A (SAA) is an acute-phase protein which is produced in response to various inflammatory stimuli. We examined the anti-inflammatory actions of SAA. Pretreatment of rat peritoneal mast cells with SAA significantly reduced both IgE-induced and ionophore A23187-induced exocytosis of endogenous mediators. The presence of albumin had no effect on the actions of SAA. SAA also inhibited interleukin-4 (IL-4) production from rat splenic cells stimulated with anti-CD3 and anti-CD28 antibodies. These results indicate that SAA can modulate inflammatory responses and that the property of SAA to reduce exocytosis of endogenous mediators appears to be unrelated to its cholesterol-lowering effect.

**Q:** Creating/Editing a File with an InputStream from a Source (Android) Is it possible to convert a byte array or inputstream to a text file. I have a byte array, a source and a path where I want the file to be written. I can't seem to find anything on the internet.

**A:** It is quite easy, public static void createFile(InputStream is, String path) { try { OutputStream os = new FileOutputStream(path); byte[] buf = new byte[256]; int readCount; while ((readCount = is.read(buf)) > 0) { os.write(buf, 0, readCount); } os.close(); }
