TC265

But have a look. I tried to find my father's one but no luck.. The cable is very similar to the one you gave me. I did not find any kind of converter PCB in the USB cable. I'm sure the board is connected somewhere near the USB end. I have the same radio with a usb cable and it worked with the programming software. As far as I know. The board is mounted somewhere in the USB end of the cable. I'll try to look if the hytera USB connector is the same.
